Re: Notice of Reclamation - File No. M/027/087 Tejon - Mauve, Smoke and
Buckskin Quarries, Millard County, Utah - Operator Stone Resources, LLC

To The Above Named Administrative Officials:

Please be advised by this Notice that Stone Resources intends to immediately commence reclamation of the Tejon - Mauve (Tejon No. 3 .99 acres), Smoke (Tejon No. 2 1.32 acres) and Buckskin Quarry (Tejon #1 4.67 acres, formerly Levin), Millard County, Utah, pursuant to terms of the Large Mine Reclamation Contract File No. M/027/087 and the NOI for Large Mining Operations for Tejon Quarries, approved July 13, 2006. The

Operator intends to reclaim all the lands affected by the mining operations conducted on the above referenced Mauve, Smoke and Buckskin Quarries pursuant to the approved Notice of Intention.

Upon completion of reclamation satisfactory to the Division, the Operator is requesting a reduction in the aggregate face amount of the presently posted Surety. The reduced amount will then only allow thereafter for reclamation of the Burgundy quarry (Tejon # 4 Red Gulch Quarry 2.93 acres). Any amounts above the amount necessary to bond reclamation at the Tejon #4 site should immediately be released and returned to the Operator.

According to the approved Reclamation Plan, a part of the Large Mine Reclamation Contract, the Operator is required to and will restore the quarries as suitable for use as wildlife habitat. Highwall will be reduced in slope and all pits, if any will be partially backfilled with waste material. Bench floors and pallet storage areas will be ripped prior to placement of waste to allow for better drainage. If any portions of the waste dumps have been compacted, they will be ripped prior to placement of any plant growth material. The Operator intends to remove all pallets as specifically required by the approved reclamation plan and as obviously necessary to complete the required reclamation work including ripping of the pallet storage areas.

All pallets containing stone will be removed from the quarry sites being reclaimed and placed in storage at the Operators facility in Delta, Utah awaiting a disposition by the BLM as to the weight of the stone as may be required for a final determination as to any royalty or mineral purchase amounts.

The Operator has negotiated for the use of a Bulldozer which will be delivered to the quarry sites May 17, 2010 at which time reclamation will begin.

The Operator is hereby also giving Notice that it does not intend to abandon the Mauve (Tejon No. 3), Smoke (Tejon No. 2) or the Buckskin Quarry (Tejon No.1) and will in the future, as applicable, be filing mining plans to resume operations at these quarries.

Should you have any questions please call W. David Weston, 801-706-3462.

Sincerely
Stone Resources, LLC
